Hand Hygiene System

# PURELL SMARTLINK® Hand Hygiene System

The PURELL SMARTLINK Hand Hygiene System offers a wide range of solutions that help increase quality of care, all with the flexibility you need to meet your hand hygiene goals -- from custom data collection, to labor efficiencies, to ongoing clinical guidance.

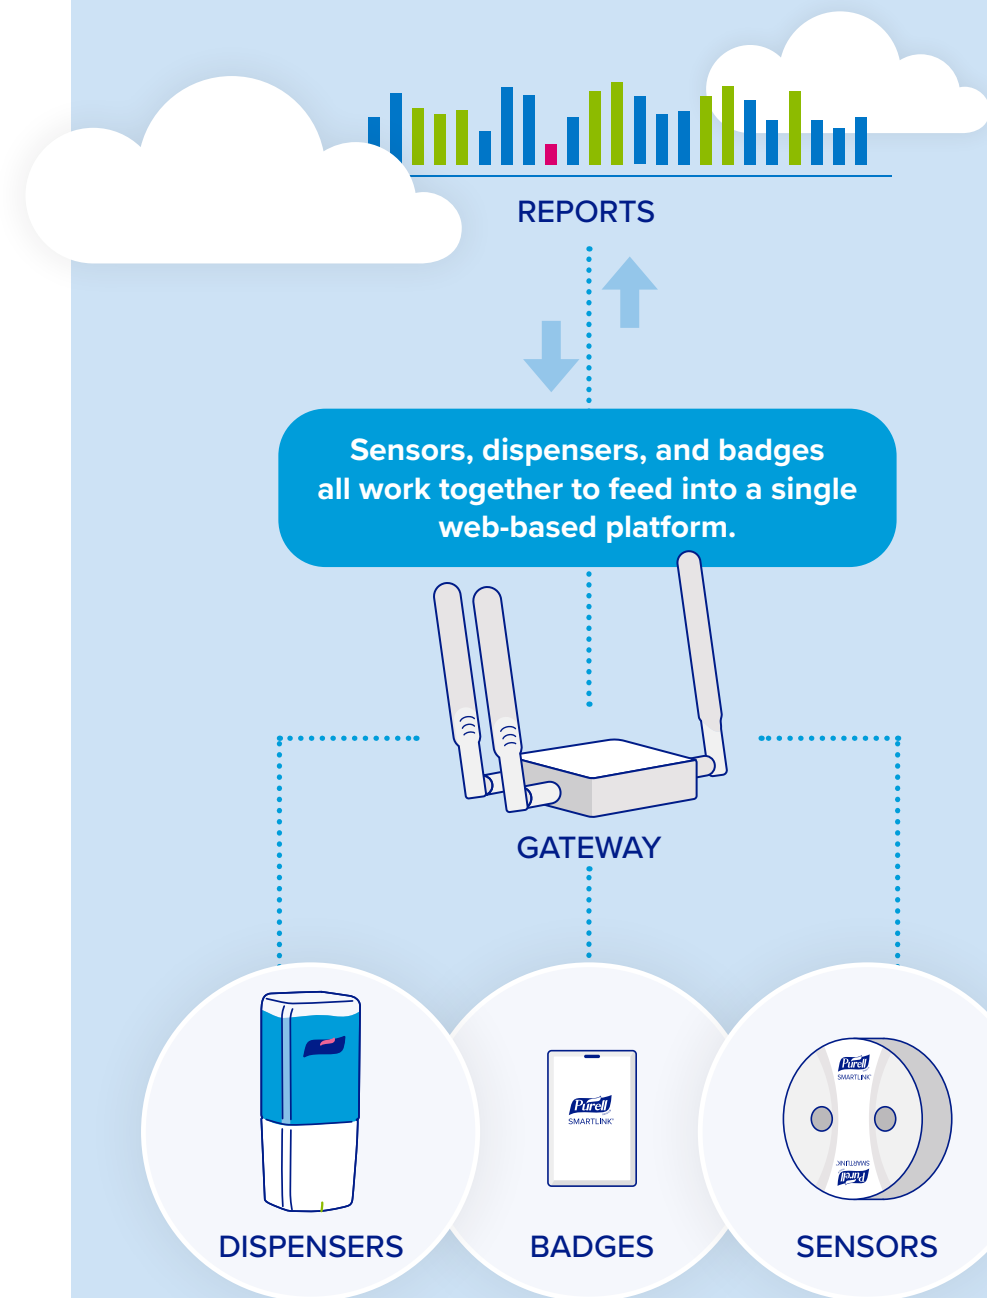

## PURELL® ES10

The heart of PURELL SMARTLINK, the ES10 is our simplest, most sustainable\*, touch-free dispensing system. See back cover for more information.

## Data Makes the Difference

Our system captures an average of 63,000 opportunities for hand hygiene per medical unit per month.

### Customizable reports and filtering options by:

- Location (floor, unit, room)
- Formulation (soap vs. sanitizer)
- Date range (pre-selected or customized)
- Shifts
- Devices
- Job role or person

### WEB-BASED SOFTWARE

- Intuitive, easy-to-use design
- Reliable and accurate data available 24/7
- Secure access on multiple devices
- Set baseline and goals for improvement
- Report subscriptions delivered to your inbox

## Unit-Based Monitoring

Sensors collect all hand hygiene opportunities within a designated area without badges. This includes visitors. Ideal for broad sets of data and to document overall improvement.

## Direct Observation Software

Our app-based software helps you to efficiently collect direct observations and export data with ease.

## PURELL SMARTLINK® Service Alerts

Sensors notify teams of low refills and dispenser maintenance needs. Proactive alerts give EVS teams in large facilities an edge by helping them know when and where to deploy resources.

## Flexible Data Collection

CHOOSE ONE OR MORE FOR ANY AREA.

## Labor Efficiencies

SAVE EVS TIME. ENSURE PRODUCT IS READY.

OPTIONAL UPGRADE

## Badge-Based Monitoring

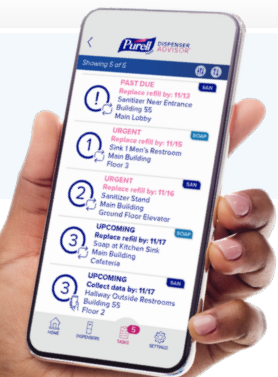

Collect data down to the individual or job role level using modernized badge-based technology. Can be paired with Unit-Based and Direct Observation Monitoring for the best full picture of your facility.

## PURELL DISPENSER ADVISOR™

App learns usage patterns through manual inputs and estimates when refills need to be replaced. Ideal for smaller units or facilities, where there are only a few dispensers to manage or sanitizing stands that are outside normal workflows.

# Ongoing Clinical Guidance

PARTNERS ON YOUR ROAD TO SUCCESS.

Leverage the extensive hand hygiene and data analysis expertise of experienced clinical consultants throughout your journey -- not just at set-up. Your dedicated consultant will help you sort through all the data, identify insights, and make decisions using the data.

## Mix. Match. Optimize.

Our comprehensive set of tools can flex into the spaces you need the most. Mix and match within a facility or across multiple facilities you manage.

## Technology Partner Network

USE WITH YOUR EXISTING RTLS NETWORK.

If your facility already has a Real-Time Locating System (RTLS) installed, PURELL SMARTLINK® may integrate to provide you even more flexibility to meet your monitoring needs. This allows you to achieve a greater return on investment by enabling you to connect with a system you may already have in place and continue to use the most trusted brand of hand hygiene products in hospitals.<sup>1</sup>

 <b>PURELL SMARTLINK Service Alerts</b>	 <b>PURELL DISPENSER ADVISOR™</b>	 <b>Direct Observation App</b>	 <b>Unit-Based Monitoring</b>	 <b>Badge-Based Monitoring</b>
Ideal for: Large facilities Units with full EVS teams	Ideal for: Satellite locations Lobbies Public restrooms Small, self-managed healthcare units	Support manual data collection anywhere with app-based technology	Suggested for: General patient rooms ICU Oncology Anywhere there are heightened patient interactions	Individual badges can be added into areas with higher acuity patients or where you need more granular data to manage compliance

## LET US CUSTOMIZE A PLAN TO FIT YOUR NEEDS.

### What's Included in the Core Program:

- Installation of the hardware and configuration of the software by a dedicated Project Manager for unit-based and direct observation monitoring
- Dispenser service alerts
- Dedicated clinical consultant for the first year
- Maintenance plan, including annual system health assessment
- Web-based software access

### Optional Add-ons:

- Badge-based monitoring
- Additional dispenser service alerts outside monitored patient care areas
- Additional clinical consulting support and visits

## PURELL® ES10 Touch-Free Dispensing System

The foundation of PURELL SMARTLINK®

### LESS MAINTENANCE

Never change batteries\*\* and check product levels at a glance.

### MORE SMART SOLUTIONS

Seamlessly connects with the PURELL SMARTLINK Hand Hygiene system.

### LESS WASTE

Easy to snap apart components for simplified recycling.

### MORE WAYS TO IMPRESS

Exceptionally quiet dispensing. Slim design fits in tight spaces.

1. Results based on a nationwide online survey of 150 hand hygiene and surface product key decision makers in acute care market, October 2023; MR#006-133.

\* Has less 30% less plastic per refill and a 38% reduction in greenhouse gas emissions compared to ES8 system.

\*\* Under normal usage conditions.
