# Infinite demand'

Pandemic leads to massive growth, new jobs at Wooster Purell maker Gojo

Gojo employee Nicole Goolsby works on the assembly line at the company's plant in Wooster. COURTESY GOJO INDUSTRIES

Alexander Thompson Special to Wooster Daily Record USA TODAY NETWORK

WOOSTER - On March 3, 2020, the leading figures of the region's industries gathered for the Wayne County Economic Development Council's annual breakfast.

The keynote speaker that morning was Carey Jaros, the new CEO of Akron-based Gojo Industries

who had assumed the reins of the company known for manufacturing Purell hand sanitizer a little more than two months earlier.

Tom Pukys, the executive director of the council, said a couple of attendees asked about the mysterious virus gripping China, but the conversation over breakfast centered on the

basics of the company and learning about its new

"The discussion really wasn't about the pandemic," Pukys said.

However, Jaros told the crowd that her company's sales were up "significantly," and they had shifted into "high response mode" as they had for previous demand spikes. A team at Gojo was keeping a watchful eye on the global outbreaks and the handful of cases in the U.S.

"In past demand surges, this is a typical pattern," Jaros said at the time. "So, you see out-of-stocks and then supply catches up and everything kind of calms down."

As it turned out, COVID-19 is not typical. Everything did not calm down. Not for Gojo. And not for

#### Gojo couldn't keep up with demand for hand sanitizer

Demand for the company's products went, quite literally, off the charts, igniting expansion in Stark County, Cleveland and Ashland. People were buying so much Purell so quickly Jaros dubbed the phenomenon "infinite demand." No matter what the company did to increase supply it could never catch

The pandemic has fundamentally changed the 75-year-old, family-owned company's trajectory

# Virus cases in nursing homes plummet

Columbus Dispatch USA TODAY NETWORK

Nearly two months into COVID-19 vaccinations, cases appear to have dropped or at least leveled off in one of the hardest hit places: nursing

Newly reported cases per week dropped from a high of 10,189 on Jan. 7 to 1,846 as of Wednesday, the most recent week for which data is available from the Ohio Department of Health. That marks an 82% drop in four weeks, data shows.

Time will tell whether the current drop is a trend or an anomaly. The last time cases were consistently below 1,000 a day was in late October, according to data provided by the Ohio Department of Health to The COVID Tracking Project, an online state-by-state virus database created by the publication The Atlantic.

Regardless, long-term care facilities are excited about what for now feels like a victory, said Ursel McElroy, director of the Ohio Department of Aging.

# **DeWine** proposes Ohio vehicle fee increase

**Jackie Borchardt** 

Cincinnati Enquirer USA TODAY NETWORK

The cost of registering your car or truck every year in Ohio would go up under a proposal from Gov. Mike De-

Ohioans would pay \$10 more for motor vehicle registration fees and \$2 more for the title fee under De-Wine's two-year budget plan unveiled Monday.

The registration fee hike would bring in an estimated \$127 million each year for the Ohio Department of Public safety, with most of it supporting the State Highway Patrol and some going to the Bureau of Motor Vehicles.

Annual registration fees start at \$31 for passenger vehicles before local fees, often \$20 or more, are applied. Current fees generate about \$466 million a year. The original fee was established to make up for declining revenues from the gas tax, spokeswoman Kristen Castle said, and hasn't been adjusted for infla-

"Without this additional funding, dramatic and unprecedented reductions in staffing and services would be required overwhelmingly within the patrol," Castle said. "The community and our local, state, and federal partners consider these services critical and have come to rely on

# Gojo

Continued from Page 1A

from steady, measured expansion to breathtaking growth almost overnight. And Gojo's boom has proved providential at a time when many Northeast Ohio employers have shed jobs.

#### 'Infinite demand' for Purell

Especially early on in the pandemic, consumers rushed to stores and cleared hand sanitizer off the shelves; domestic hand sanitizer sales to individuals shot up by about 600% last year, according to the Nielsen Corporation, a market research firm.

Many of the bottles they were grabbing were Gojo's Purell, which controlled a dominant 25% of the hand sanitizer market before the pandemic, according to

Though widely shared internet memes suggested that Purell's executives were swimming in vats of gold Scrooge McDuck-style, that was far from what was really happening at 1 Gojo Plaza in downtown Akron.

In a series of meetings every morning, the company was desperately trying to determine where the scarce shipments of sanitizer were needed most, Jaros said on an NPR podcast in October.

However, rationing was just a short-term solution. Though Gojo could never hope to meet the "infinite demand" they needed to ramp up production as fast as possible.

The company went from two shifts five days a week to three shifts seven days a week at its plants in Cuyahoga Falls and Wooster in the early months of 2020. It still was not enough.

## **Company expanding to Ashland**

Gojo opened two new facilities: Navarre in Stark County and Maple Heights in Cuyahoga County. In the fall it rented 700,000 square feet for storage in Cleveland's I-X Center and will soon open a new storage and distribution center in Ashland. It spent \$400 million on capital investments in 2020, 10 times more than an average year.

In total, Gojo grew from 2,500 employees before the pandemic to about 3,000 today.

"It's probably the hardest year of my professional life. It's also one of the hardest years of my personal life, because this has just been a really diffi cult time for all of us," she said in an interview with The Daily Rec-ord. "And at the same time, it's been one of the most rewarding years of my professional life."

The CEO said she feels now more than ever that she's doing vital work; Gojo's products are critical to keeping schools open and health care workers safe.

Presiding over what is by some measures the company's largest and fastest expansions ever, all of it in her native Northeast Ohio, has been gratifying.

"Have I worked a lot of hours?" she said. "Yes. All of our Gojo team members have probably worked three years in one year."

Jaros, who joined Gojo in 2014, does fi nd time to un-wind. She begins every day at 5 a.m. by practicing yoga and said her husband and children help keep things in perspective.

## **Workers needed at Gojo Industries**

Increasing production is not as simple as fl ipping a

Gojo Industries, founded in 1946, is headquartered in Akron. PROVIDED

are needed to get a bottle of Purell from raw materials onto your hands.

Shortages of hand sanitizer wreaked havoc on the supply chain causing shortages of everything that goes into it, Jaros explained.

The company had to get creative.

"They either need to have suppliers who are flexible like them and can increase the supplies to them or they have to find alternative supplies," Kent State University Professor of Management Dean Porr said.

Gojo's suppliers could not ship enough bottles and pumps so the company improvised, putting hand sanitizer in everything from rubbing alcohol containers to dish soap bottles. The company also set up plastic blow molding and precision molding divisions to make its own bottles and pumps.

At the Wooster facility mix production still greatly exceeds bottle and dispenser production, but new equipment is coming online every month.

Once the company overcame most of its supply problems, a new problem cropped up: Not enough workers. Jaros said it is still the company's biggest challenge.

Recently, for example, there were 34 open positions at the Wooster plant.

"I think our ability to find and attract and retain talent continues to be our priority," Jaros said. "That's not to say it's an impossible challenge by any stretch."

### **Most Purell made in Wooster**

Gojo arrived five years ago in the hulking former headquarters of Rubbermaid. It was a wise investment. Pushed to its limit by the pandemic, Jaros said, the Wooster facility proved critical.

'Without Wooster we could not have done what we did in 2020, and we could not do what we're planning in 2021," she said. "It is an essential part of our ability to respond to the global pandemic.

Gojo had intended to slowly expand across the 1.3 million-square-foot plant, but the pandemic accelerated those plans.

"We expected that we would take many, many years to build out that facility fully," Jaros said. "By the end of 2021 we will have built out much of the facility."

The Wooster plant had about 500 workers last switch. A lot of ingredients, packaging and shipping March and has since added 270 additional employees, producing a majority of all the Purell sold in the U.S., according to a company spokeswoman.

## New Gojo products on the horizon

Jaros believes that the pandemic has permanently changed hand hygiene habits.

"We also think that the effects of the pandemic even over the next couple of years will cause that (demand) level to be even higher than where it may ultimately settle," she added. "So we have no plans at the moment to do any kind of scaling back. We are still full steam

Gojo's lofty predictions are widely supported by market analyses that show demand slackening slightly as the pandemic recedes but remaining far beyond what it was in 2019 well into the future.

KSU's Porr agrees.

"It appears as though this is not going to be a shortlived phenomenon that people are worried about sanitizer," he said.

Seat belts are now features of every car and earplugs are available at every construction site after the public realized their importance, Porr said. Much the same could happen with hand sanitizer.

Gojo is also using the pandemic to expand its presence in the consumer market.

Though many people know Gojo for Purell, the company has historically focused on selling industrial soap and sanitizer to businesses and institutions.

Now the company is planning to launch two new consumer focused products, a heavy-duty sanitizer and a two-in-one sanitizer and moisturizer.

'We're going all guns a-blazing after the consumer market," Jaros said.

## **Northeast Ohio economy booster**

The CEO said that throughout the pandemic the company has been guided by its values of saving lives and making life better.

That is not just a corporate slogan, Jaros insists; the company puts its money where its mouth is.

Gojo has not raised prices on its vital products since the beginning of the pandemic, and any change in sticker price reflects the decision of retailers.

Additionally, every new warehouse, factory and job the company has created since the pandemic has been in Northeast Ohio.

The company, owned by the Kanfer Family of Akron, plans to keep it that way.

Those jobs have been desperately needed as pandemic lockdowns and uncertainty threw thousands out of work.

"Lots of service sector jobs started to really go on hold and be paused like in the retail and restaurant industry," Pukys from the economic development council said. "So (Gojo) really gave the people who had lost their jobs there the opportunity to work in a plant and make very good money."

Gojo was one of the main reasons Wayne County was able to ride out the pandemic economically, Pukys said.

"It's a tremendous economic engine," he said. "I mean it's hard to put a value on that."
